

How to change the text direction of an element?

Article Number: 31 | Rating: Unrated | Last Updated: Sat, Sep 26, 2020 at 1:51 AM

```
$('#input').keyup(function(){
  $this = $(this);
  if($this.val().length == 1)
  {
    var x = new RegExp("[\x00-\x80]+"); // is ascii

    //alert(x.test($this.val()));

    var isAscii = x.test($this.val());

    if(isAscii)
    {
      $this.css("direction", "ltr");
    }
    else
    {
      $this.css("direction", "rtl");
    }
  }
});
```

[Here's a working example.](#)
