

## How to Export a vSphere ESXi 6.7 Virtual Machine

Article Number: 68 | Rating: Unrated | Last Updated: Sat, Jan 1, 2022 at 12:10 PM

### Login to the ESXi Host

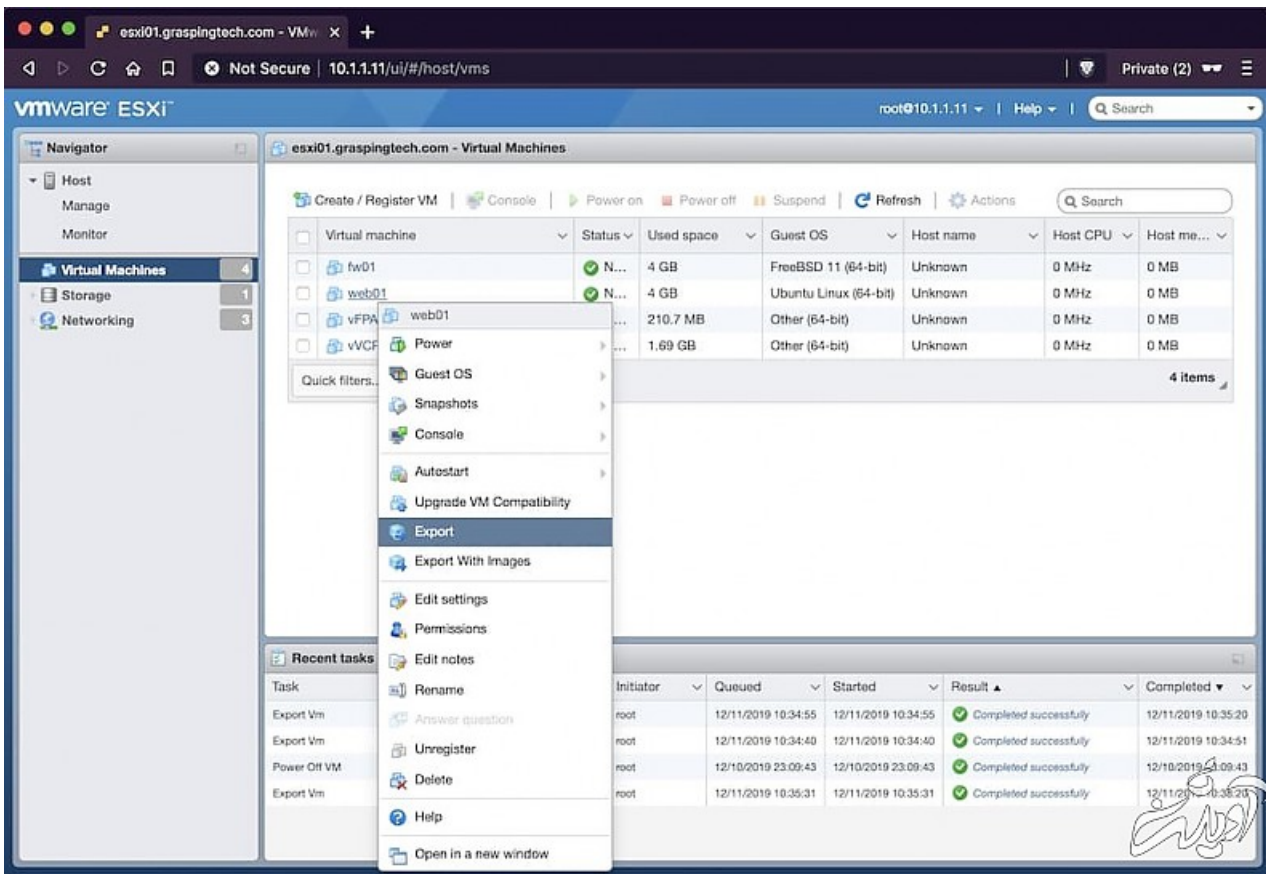

First of all, login to the web management interface of the ESXi 6.7 host by typing the IP address into a web browser.

Login Screen

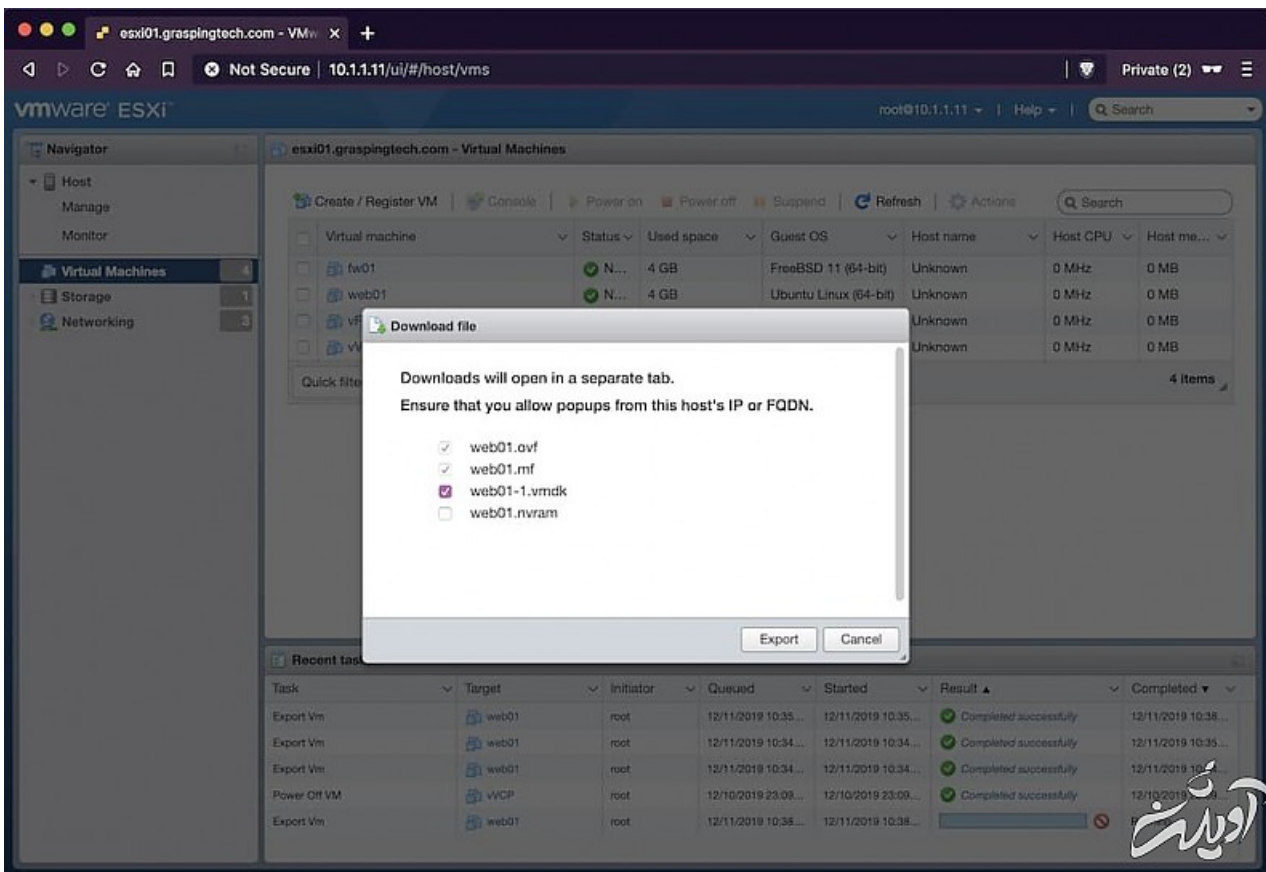

### Export the VM as an OVF

Click on Virtual Machines, right click on the name of the virtual machine you want to export, then click Export.

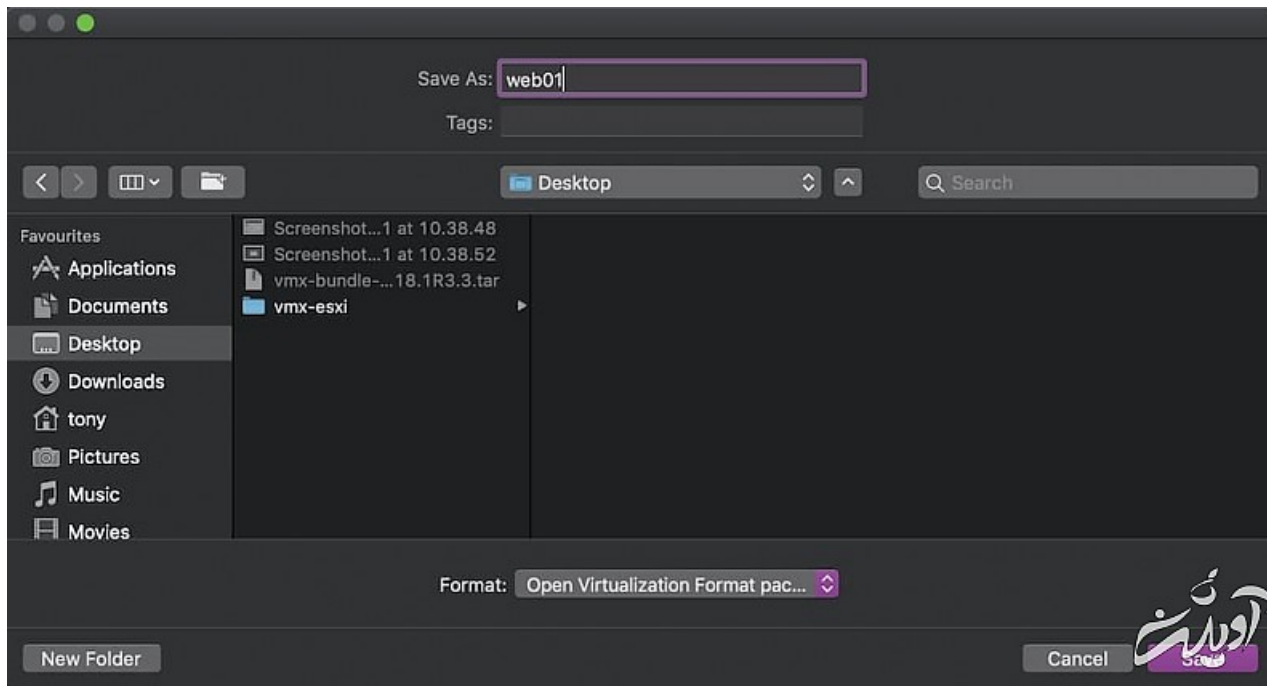

Step 1

Click Export.

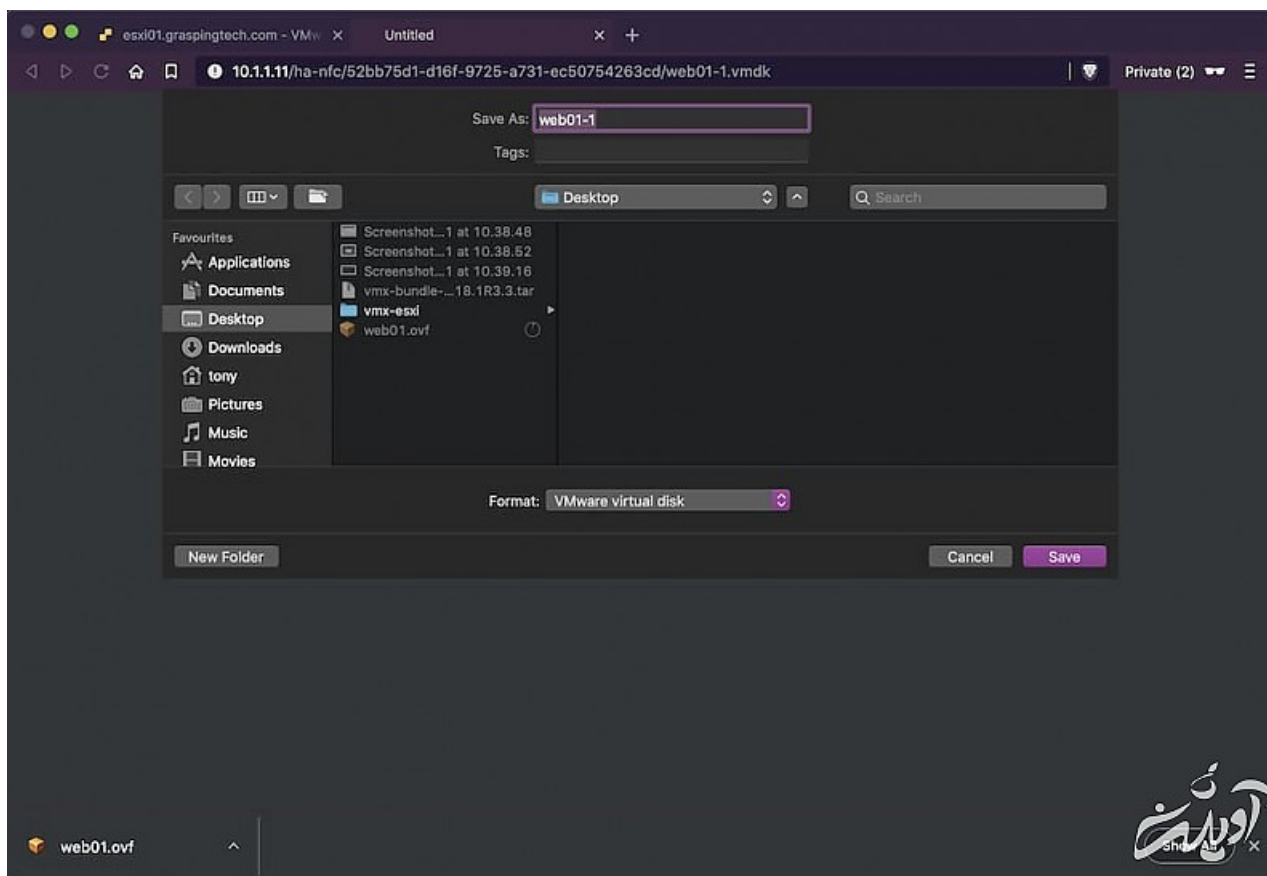

Step 2

Choose a location to save the OVF file to.

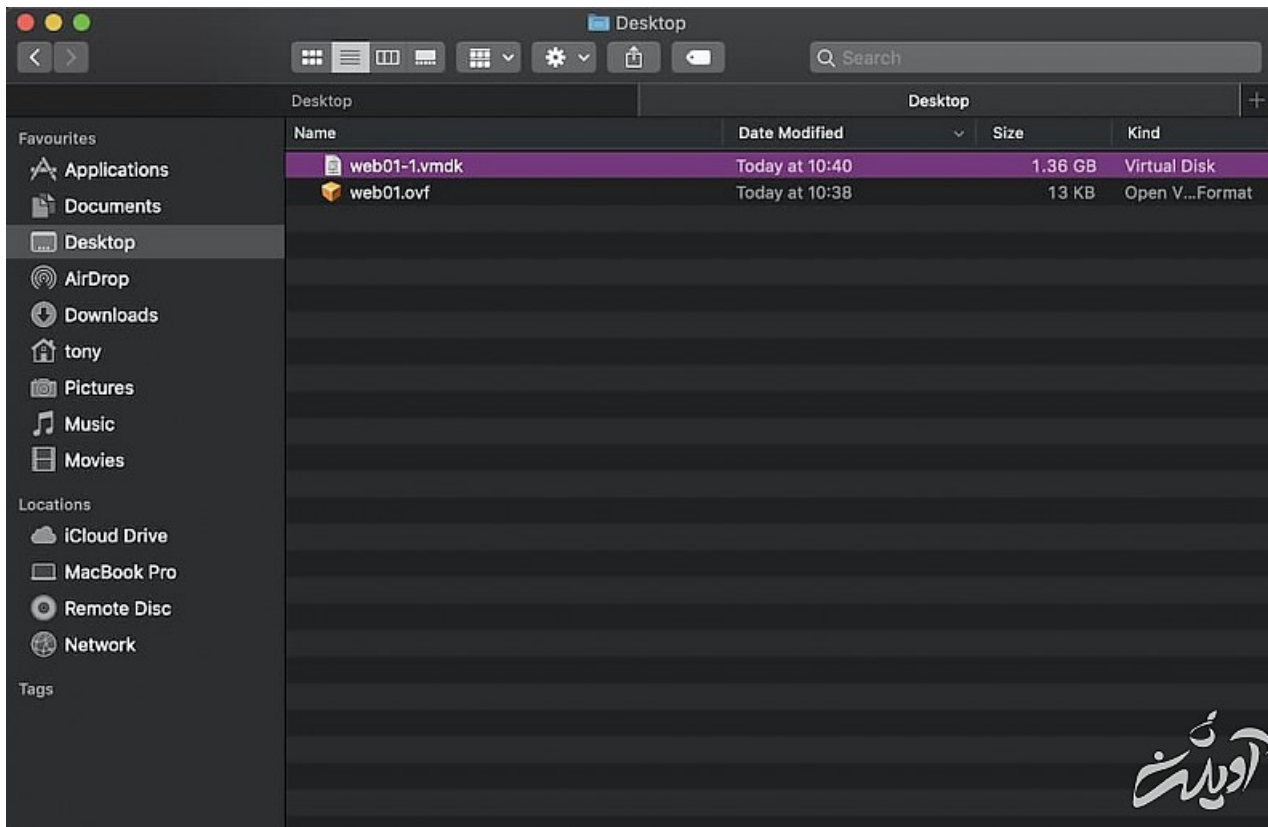

Step 3

Save the VMDK files to the same location.

Step 4

Wait for the export to complete and then check the location on your local machine for the exported files.

OVF

Exported
